

Flight Instruction | Instructor

General Requirements:

1. Be at least 18 years of age.
2. Hold at least a commercial pilot certificate with an instrument rating..
3. Be able to read, speak and understand the English language.
4. Pass two Written Exams as well as the FAA practical flight test.

Ground/Flight Requirements:

There are no minimum FAA requirements for ground or flight time for the flight instructor rating. On a national average, however, students have averaged about 25 hours of ground instruction including classroom instructing techniques and 15 hours of flight instruction. Each individual may require more or less time depending on past experience, knowledge and currency. A background or previous experience in teaching or public speaking is helpful, but not required.
